

FIRALIS GROUP is hiring A LEADING MANAGER for its PRODUCTION FACILITY !

Location : Huningue 68330 - France

Desired Start : 01-07-2017 or sooner (negotiable)

Contract : 12 to 18 Months full-time contract, extendible to a permanent contract

Firalis is a European leader group of biotechnology companies, active in **biomarkers** science.

We create novel values via biomarker discovery and development for biomarker-based diagnostics, in a unique location of the heart of BioValley, at triple border of France, Switzerland and Germany.

www.firalis.com

The **PRODUCTION MANAGER** will **plan, design** and **perform** assays to assure that final products meet all the requirements of ISO 13485 norm. He/She will be responsible for the **optimization of the overall production process of proteins (calibrators and antibodies) and ELISA kits**; with a proven experience, both in “hands-on” and “supervisory” capabilities for:

- Cell culture (Hybridomas, bacterial and mammalian cells),
- Molecular cloning, protein expression (bacterial and mammalian cells) and characterization,
- Protein (calibrator and antibodies) isolation and purification using chromatography (affinity, ion exchange, size exclusion). FPLC experience required (AKTA purifier), Electrophoresis helpful.
- Scale-up of production/purification capacities,
- Knowledge in robotic instrumentations,
- Protein (calibrators and antibodies) validation (purity, activity and functionality) via various functional tests, i.e. WB / ELISA / IHC / IP / IF / FACS,
- Protein lyophilization,
- Production and release of proteins (calibrators and antibodies) and ELISA kits batches,
- Small and large scale buffer preparations,
- Leading all production activities including risk assessments, control strategy adaptation, introduction and development of innovative analytical technologies.

In addition, the **PRODUCTION MANAGER** will have the **responsibility** to:

- Present technical and analytical data in a clear and meaningful way, internally and for customers,
- Record generated data in the appropriated forms and keep the traceability of the produced items,
- Perform all tasks throughout production process, in compliance with the ISO 13485 environment.

MINIMUM DIPLOMA / COMPETENCES REQUIRED

- MSc/PhD in molecular/cellular biology,
- 2 years of experience in protein production and purification,
- Proven knowledge of assay development and validation processes,
(Understanding and knowledge of diagnostic market is a plus)
- Experience of working in a GMP environment,
- Excellent communication skills (careful listener & precise speaker)
- Strong commitment for timely execution of tasks and project milestones,
- Ability to work in a multicultural environment
with fluent English and French,
- Good knowledge of office software
