

The Biomarker's Newsletter

Dear Customer,

Sharing common scientific interests on the cardiovascular domain, Firalis would consider initiating a partnership in order to communicate (publication / poster) on our innovative biomarkers assay kits.

One of them could be a particular interest for your research program, the Calponin 1 ELISA kit.

Colorimetric Sandwich ELISA kit – Human CNN1 (RUO*):

Spec. sheet: http://www.firalis.com/doc/Brochure_CNN-1.pdf

Calponin-1 (or Basic Calponin/CNN-1) has been demonstrated as a potential circulating biomarker of arterial damage and acute aortic dissection event ([Suzuki and al](#)) and a future candidate as diagnosis biomarker for AAD.

Would you like to discuss such collaboration with us, then do not hesitate to contact us.

Hope the information hold your attention.

Looking forward to hearing from you,

Best regards,

Firalis Sales Team
