

Dear Customer,

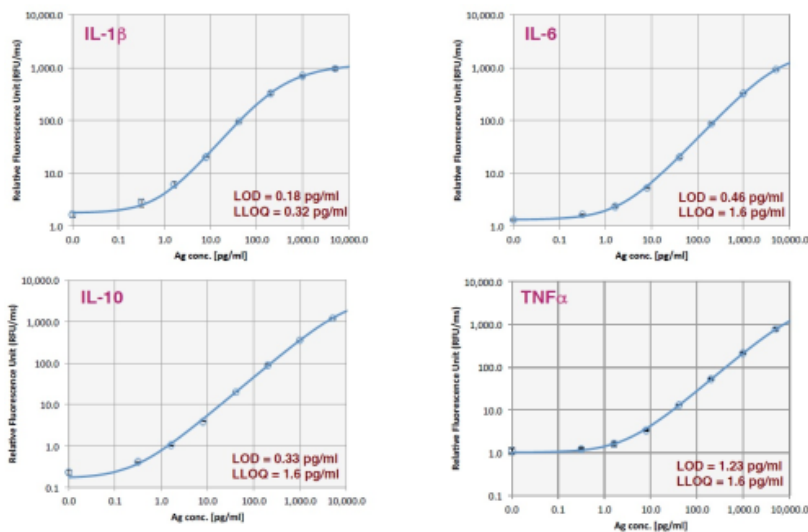

Firalis expands its biomarker analytical platform by implementing 2 CyPlex™ instruments from CyVek.

The fully **automated** CyPlex™ can quantify up to **4 analytes in parallel** in less than 60 minutes and generates data of **clinical diagnostic quality** in term of performances and robustness.

Thanks to a pioneering microfluidic-based technology, the CyPlex™ instrument performs up to 4 individual immunoassays simultaneously, each one occurring in a separated reaction channel thereby **avoiding potential interference and cross reactivity**.

The fully automated, cartridge-based assay system enables simple and fast measurement of clinical samples with diagnostic grade performance :

Standard curves are determined from a 4-analyte cartridge with IL-1 β , IL-6, IL-10 and TNF α ; Standard deviation are shown for all data points on the curves; (Data provided by CyVek)

Mean %CV on duplicate measurement of 15 serum samples :

Analyte	%CV
IL-1 β	4%
IL-6	3%
IL-10	2%
TNF α	4%

AGENDA 2014

Where to meet us :

25th - 26th November

Firalis will be present at the "4th Munich Biomarker Conference"

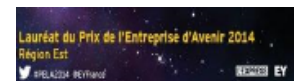

Münich, Germany.

A New Prize for FIRALIS :

29th September

FIRALIS has been awarded as "Entreprise of Future - 2014" by Ernst and Young.

FIRALIS Kits' Offer :

Within year 2014

Enjoy a **50% discount** on our ELISA Kits among :

[CNN1](#), [Clusterin](#), [NGAL](#), [PRDX2](#) and [PIGF](#)

Contact us to request a quote !

Firalis provides you with a range of fully documented services around **genomic and protein biomarkers** (ISO17025 - ISO13485 - ISO9001).

The technical platform includes a series of technology in order to answer all of your bioanalytical needs: CyPlex™, Meso Scale Discovery®, Luminex®, Singulex®, HTGEdge®, ABIPrism®, Siemens Dimension® and a Multimode plate reader.

[Contact us](#) to get more information about our [biomarker analytical services](#) !

Hope to hear from you soon,
